2x

A pallet is normally loaded like this.

The sections are located like this:

Side view:

Valves are always pointing forward! Towards land!

Please unload the pallet and place all sections on the ground.

Section D

Section C

Section B

Section A

Uninstall all screws pointed out with red arrows.

Push the sections A-D together and reinstall the screws.

⚠ IMPORTANT NOTICE

When installing Lug Connectors, do not overtighten it once you have reached the point of full turning.
After, unscrew by 1/4 in the opposite direction.

Launch the Jet Slider to the water and then open the caps in the rear two cubes.

Side view:

Add ballast water to the two rear cubes in section D. Then reinstall the caps.
